RStudio Projects

Put together in one place!!

RStudio Projects

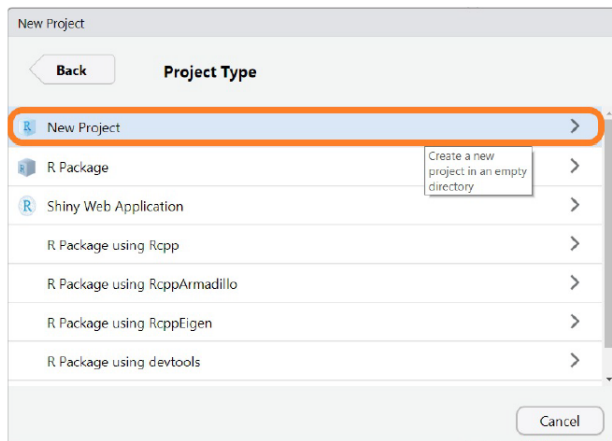

A project is simply a working directory designated with a `.RProj`. When you open a project (using File/Open Project in RStudio or by doubleclicking on the `.Rproj` file outside of R), the working directory will automatically be set to the directory that the `.RProj` file is located in.

RStudio Projects

RStudio Projects

Select "New Project"

RStudio Projects

Define Directory Location

New Project

Directory name:

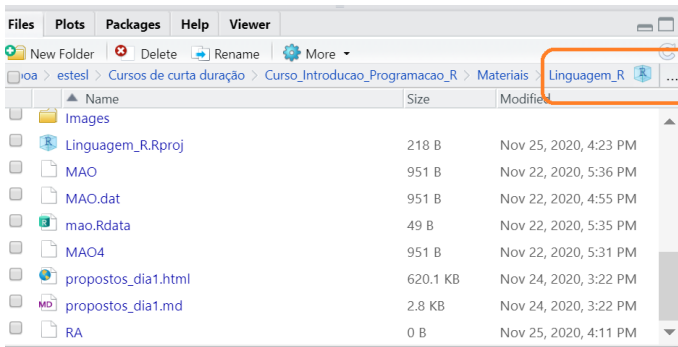

Create project as subdirectory of:
 [Browse...](#)

☒ Create a git repository

☐ Open in new session

[Create Project](#) [Cancel](#)

RStudio Projects

RStudio Projects

In summary, RStudio projects give you a solid workflow that will serve you well in the future:

- ▶ Create an RStudio project for each data analysis project.
- ▶ Keep data files there.
- ▶ Keep scripts there; edit them, run them.
- ▶ Save your outputs (plots and cleaned data) there.
- ▶ Everything you need is in one place, and cleanly separated from all the other projects that you are working on.

Writing beautiful documents!!!

Introduction

HTML "Analysis" Document

World Population Data

Exercise Questions

Read in the data

Pre-processing the Data

Exercise Answers

Portugal: 1950 v 2017

World Population

Population by Continent

Population by Country

Portugal: 1950 to 2015

High & Low Female Proportion

Portuguese Females Over Time

Read in the data

First load the `data.table` package (hint: use the `library()` function). Then use the `fread()` function to read in the data file `World-Population.csv` in an object called `un`. Finally look at the `un` dataset using the `str()` function.

```
library(data.table)
un <- fread("World-Population.csv")
un
```

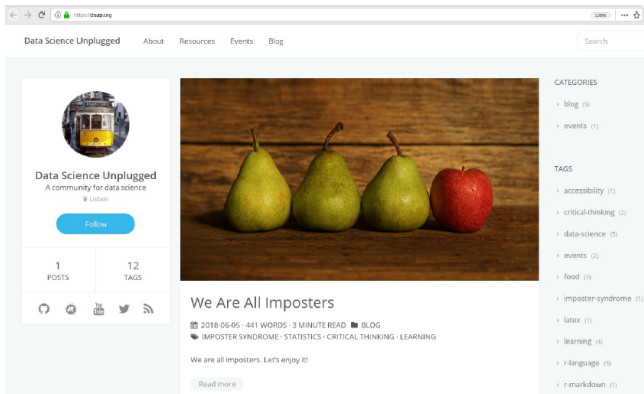

```
##      continent Location Time AgeGrp AgeGrpStart PopFemale PopMale
##  1:      Asia Afghanistan 1950  0-4          0    661.58  630.04
##  2:      Asia Afghanistan 1950  5-9          5    487.33  516.21
##  3:      Asia Afghanistan 1950 10-14         10    423.33  461.38
##  4:      Asia Afghanistan 1950 15-19         15    369.36  414.37
##  5:      Asia Afghanistan 1950 20-24         20    318.39  374.11
##    ---
## 47942: Africa      Zambia 2015 00-04          0     23.30  16.10
## 47943: Africa      Zambia 2015 05-09          5     9.17   5.04
## 47944: Africa      Zambia 2015 10-14         10     2.40   1.30
## 47945: Africa      Zambia 2015 15-19         15     0.35   0.16
## 47946: Africa      Zambia 2015 20-24         20     0.03   0.01
```

```
str(un)
```

```
## Classes 'data.table' and 'data.frame':  47946 obs. of  7 variables:
## $ continent : chr "Asia" "Asia" "Asia" "Asia" ...
## $ Location : chr "Afghanistan" "Afghanistan" "Afghanistan" "Afghanistan" ...
## $ Time : int 1950 1950 1950 1950 1950 1950 1950 1950 1950 1950 ...
## $ AgeGrp : chr "0-4" "5-9" "10-14" "15-19" ...
## $ AgeGrpStart: int 0 5 10 15 20 25 30 35 40 45 ...
## $ PopFemale : num 662 487 423 369 318 ...
```

The R Series

R Markdown
The Definitive Guide

RMarkdown Formats

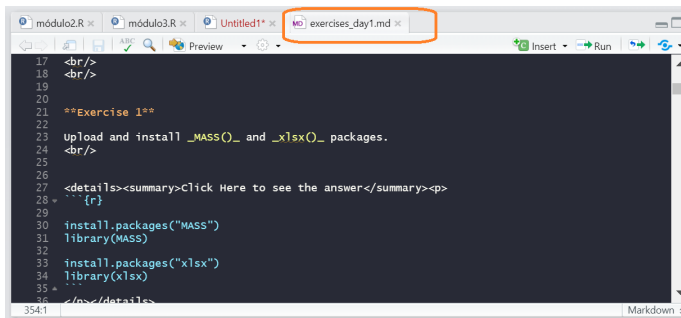

- ▶ HTML
- ▶ PDF
- ▶ Word
- ▶ PPT
- ▶ Dashboards
- ▶ Web Applications
- ▶ CVs

What is Markdown

Special computer language (“Markup”)

- ▶ Plain text with special syntax.
- ▶ Human readable.
- ▶ Converts HTML, PDF, ...

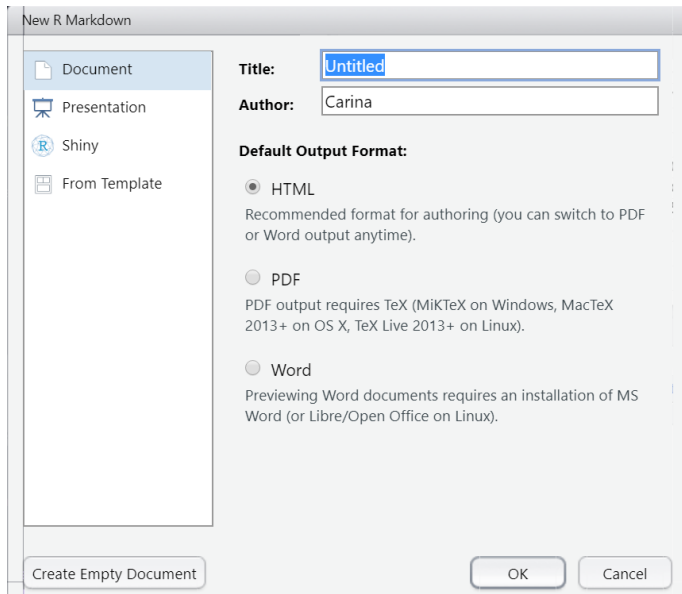

Markdown Example

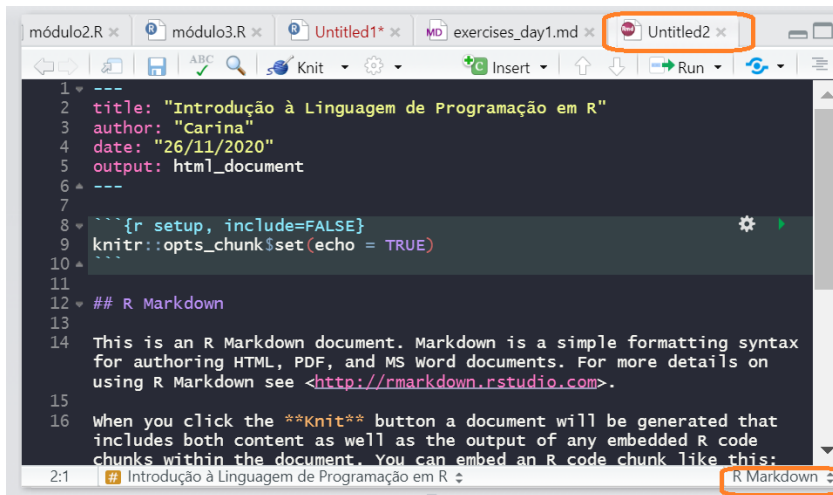

```
17 <br/>
18 <br/>
19
20
21 **Exercise 1**
22
23 Upload and install _MASS() and _xlsx() packages.
24 <br/>
25
26
27 <details><summary>Click Here to see the answer</summary><p>
28 ...{r}
29
30 install.packages("MASS")
31 library(MASS)
32
33 install.packages("xlsx")
34 library(xlsx)
35 ...
36 </p></details>
```

What is R Markdown

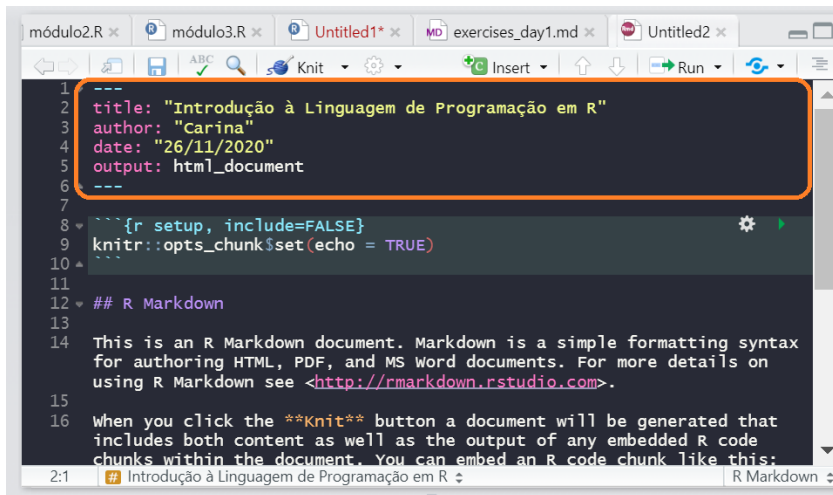

- ▶ R code and documentation in one place.
- ▶ Great for doing reproducible research.
- ▶ Great for collaborating and sharing.
- ▶ Converts to HTML, websites, articles, books, ...

```
1  ---
2  title: "Introdução à Linguagem de Programação em R"
3  author: "Carina"
4  date: "26/11/2020"
5  output: html_document
6  ---
7
8  ```{r setup, include=FALSE}
9  knitr::opts_chunk$set(echo = TRUE)
10 ```
11
12 ## R Markdown
13
14 This is an R Markdown document. Markdown is a simple formatting syntax
15 for authoring HTML, PDF, and MS word documents. For more details on
16 using R Markdown see <http://rmarkdown.rstudio.com>.
17
18 When you click the Knit button a document will be generated that
19 includes both content as well as the output of any embedded R code
20 chunks within the document. You can embed an R code chunk like this:
```

2:1 # Introdução à Linguagem de Programação em R R Markdown

```
1  ---
2  title: "Introdução à Linguagem de Programação em R"
3  author: "Carina"
4  date: "26/11/2020"
5  output: html_document
6  ---
7
8  ```{r setup, include=FALSE}
9  knitr::opts_chunk$set(echo = TRUE)
10 ```
11
12 ## R Markdown
13
14 This is an R Markdown document. Markdown is a simple formatting syntax
15 for authoring HTML, PDF, and MS word documents. For more details on
16 using R Markdown see <http://rmarkdown.rstudio.com>.
17
18 When you click the Knit button a document will be generated that
19 includes both content as well as the output of any embedded R code
20 chunks within the document. You can embed an R code chunk like this:
```

2:1 # Introdução à Linguagem de Programação em R R Markdown

R Markdown

- ▶ File extension is `.Rmd`
- ▶ Top is YAML header
 - ▶ Descriptive information.
 - ▶ Format and style.
- ▶ Below the YAML header
 - ▶ markdown code.
 - ▶ R code chunks.

Markdown Components

- ▶ **Metadata:** written between a pair of three dashes —
- ▶ **Text:** regular text and math elements, plus tables, images and figures
- ▶ **Code:**
 - ▶ inline R code: ``r`` end with backtick ```
 - ▶ code chunk: starts with three backticks ````r` where `r` indicates the language name and ends with three backticks `````.
